THE SILVER MINT OF JAPAN.

At the silver mint at Yeddo the following processes are continually going on: A lump of silver of the necessary fineness, obtained from the Government mines or by melting down Mexican dollars, is placed in an iron ladle, and reduced to a molten state by means of a charcoal fire and a pair of blacksmith's bellows. It is then poured into a mould, from which it is taken out in the shape of thin rectangular bars, which are immediately thrown into a tub of cold water. On being taken out, a man seated on the ground, shears off with a large pair of fixed scissors all jagged pieces adhering to the angles. They are now handed to another man, who weighs them one by one, and a piece is cut off, if necessary, to reduce the bar to its proper weight. The next process is that of dividing the bar by a fixed pair of shears into eight equal portions of the size of icibius; this is done by a workman cutting it as accurately as his practiced eye will enable him, and his work is tested by weighing, light pieces being rejected, and the heavy ones reduced to their proper weight by the scissors. The pieces are now heated white-hot in a charcoal fire, plunged into water, boiled and washed in a kind of brine, from which they come out with a moderately bright surface. They are next very slightly milled on the two sides, and more deeply on the edges, by means of a milled hammer. They are now ready for stamping. A man places one of the pieces on a stationary die, and lays on the top the other die; a second man, armed with a huge hammer, gives one blow on the upper die, and the coin is struck. The blows are dealt in rapid succession, and the whole scene reminds one of a blacksmith's shop. Boys now punch small stars on the edges by means of chisels and hammers. The coins are weighed one by one for the last time, and the light ones rejected. The imperial stamp is added by means of another stamped chisel and mallet, and the coins are complete. They are rolled up in paper packets of 100; each packet is weighed and marked with a seal, which serves as a guarantee of its contents, and gives it currency as 100 icibius.

While every operation is performed in this primitive manner, perfect order prevails in the establishment; every man goes through his portion of the work in silence and with the regularity of clock-work, and many evince considerable skill. There are about three hundred hands employed in the building. When the men enter in the morning they are made to divest themselves of their own clothes, and put on others belonging to the mint. At the end of the day's work a gong sounds, when the somewhat curious spectacle is presented of 300 men springing from the ground on which they had been seated, throwing off their clothes, and rushing, a naked throng to one end of a yard.

Here they pass through the following ordeal in order to prove that they have no silver on them: Their back hair is pulled down and examined, they wash their hands and held them up to view, they drink water and then hollow, and lastly they run to the other end of the yard, clearing two or three hurdles on their way; after which they are allowed to put on their own clothes and depart. Mr. Sidney Loeck, her Majesty's Secretary of Legation, from whose report of this year these statements are taken by the Times, believes that the mint has been only twice entered by foreigners, and states that the apparent absence of all restrictions with regard to touching or handling the coins points to the probability that it is not often to the public. He remarks that if it were, the manners and customs of the country are not such as would preclude a mixed assemblage of visitors from going over it and remaining to the end. The quantity of silver being coined daily at the beginning of this year was 50,000 monme, which, at the rate of 23 monme to the icibu would give a total daily issue of over 11,000 bus, or about \$7,500. The whole of these coins are produced by the simplest manual labor, unaided by a single piece of machinery.

Among the sights now in Paris is the giant Woo Foo, exhibiting at the Salon Francaise. This celestial mortal measures eight feet. He and his wife—they were married about six months ago—are natives of the neighborhood of Pekin.

WHY HE DID IT.—Sometime ago the Woodland News published an item to the effect that a Chinaman jumped from the Sacramento and Yolo bridge and was drowned, and explains the cause thus: He attended the Democratic meeting at this place the night before, and heard the speaking of Johnson, Holden, Bigler and Goods; he heard each of them declare that the Chinaman was found to be elevated to their level. Fearing that such might be the case, he determined to die in preference to standing such an elevation as he was threatened with.

BRUTAL.—William Whitmore and Oscar Patten officers on board the American ship Transit, were convicted lately of beating a sailor named Henry Rean. The testimony showed that out of a crew of sixteen men twelve of them were beaten every day by the officers. During a voyage from Australia to California they also had a savage dog on board, which they were in the habit of setting on sailors and seeing him bite them.

Grover & Baker's ELASTIC STITCH FAMILY SEWING MACHINES.

Are the best in Use,

FOR THE FOLLOWING REASONS:

They are more simple and durable, easier kept in order, make a stronger and more elastic stitch, a firmer and more beautiful seam than any other. They sew all fabrics from two common spools, require no re-winding of thread, fasten both ends of the seam by their own operation, and though every fifth stitch is cut the seam will not rip.

They Stitch, Hem, Fell, Cord, Bind, Tuck, Quilt, Gather, Braid, and Embroider. No other machine Embroiders, as well as Sews perfectly.

Grover & Baker's NEW STYLES SHUTTLE MACHINES

For Manufacturing,
Combine the most modern and essential improvements.

The attention is requested of Tailors, Manufacturers of Boots and Shoes, Carriage Trimming, Clothing, and all others requiring the use of the most effective

Lock Stitch Machines,
To these New Styles, which possess unmistakable advantages over all others.

Agents wanted for the sale of the

REMOVAL.

DR. TOZER,

Formerly of Lock Hospital, London.

Would most respectfully call the attention of the public of San Francisco and vicinity to the fact that he has removed his MEDICAL INSTITUTE from the corner of Jackson and Kearny streets.

TO 108 MONTGOMERY STREET,
Adjoining Occidental Hotel.

Where he will be in attendance daily to administer to the wants of all those who may require his services. It is impossible here to mention all the diseases with which he is familiar; some, perhaps, will not be out of place. The most formidable, the most destructive to mankind is Self-Abuse. The brain being the seat of the disease, the whole system suffers in consequence. I will here enumerate some of the symptoms, so that those afflicted may be able to form an opinion in regard to their complaints and seek advice in time, thereby saving themselves a world of suffering. Nervous Debility, Loss of Memory, Pain in the Limbs and back, Palpitation of the Heart, Trembling of the Limbs, Headache and an aversion to Genital Society, especially that of Females.

There are a great many more, but these are sufficient and should be suffering from any of them, call on DR. TOZER, and he will cure you in a short time, without any interruption in your business—or state your case by letter, and there will be no occasion for your calling at the office.

STRUCTURE OF THE URETHRA
Is another formidable enemy to health. Send for one of my circulars on that disease, and inform yourselves of its terrible results. The worst cases cured in a few days.

DR. TOZER has for the last forty years given his entire attention to the TREATMENT AND CURE of SPECIAL COMPLAINTS, and will GUARANTEE a cure in all cases. His remedies are Purely Vegetable, and positive in their action.

His remedies for all FEMALE COMPLAINTS have been tried in this City and State for the last fifteen years, with the greatest success.

His FEMALE PILLS are unrivaled in the cure of suppression of the monthly sickness. Price, 25¢ per box—to be had at the office only. Sent by mail or express on receipt of price.

All letters strictly confidential. Address, through mail or address.

DR. CHAS. H. TOZER,
108 Montgomery St., adjoining Occidental Hotel,
Or, Post Office Lock Box 1884,
San Francisco, Cal.

SEWING MACHINES. DON'T BE DECEIVED.

WHEELER & WILSON'S
SEWING MACHINES.

Try it is the Best and Surest Test of Merit.

OVER 200,000
WHEELER & WILSON'S
SEWING MACHINES.

HAVE BEEN SOLD
Since they were introduced to Public Notice. And the demand is greater

NOW THAN EVER BEFORE

IS MORE EVIDENCE NEEDED,
Reading the following:

At the MISSION WOOLEN MILLS a Trial of SEWING MACHINES took place at which the WHEELER & WILSON, FLORENCE and other Machines were represented. After a thorough and impartial test of the merits of the different Machines, the

MISSION WOOLEN MILL COMPANY.

Decided in Favor of
WHEELER & WILSON,

Over all Others,
And gave orders for Thirty New Machines, paying Gold for the same.

F. L. TILSTON, Agent,
Cor. Montgomery and Sacramento streets,
SAN FRANCISCO.

FLORENCE
SEWING MACHINE.

Copy of the Report of the Committee of Awards at the Fair of the

AMERICAN INSTITUTE
NEW YORK, 1867.

To the FLORENCE SEWING MACHINE CO. for the Best Family Sewing Machine.

HIGHEST Premium: Gold MEDAL.

REASONS:
1st.—Its simplicity and great range of work.
2d.—The Reversible Feed Motion.
3d.—The perfect finish and substantial manner in which the Machine is made.
4th.—The rapidity of its working and the quality of the work done.
5th.—The self-adjusting Tension.

The Florence was awarded the first and highest premium at the State Fair of California, the only Fair on the Pacific coast at which any two double thread Sewing Machines were exhibited in competition in 1865.

The Florence received the only premium awarded, by the Mechanics Institute of San Francisco, in 1864 and 1865, to any Sewing Machine, Sewing Machine Co., or Agent. The claim of a competitor to a medal is without any foundation whatever.

Wherever the Florence has been brought in competition with other Sewing Machines, it has uniformly been declared the best. It is the most simple, easily learned, the most efficient, and its use is easily learned. Every Machine sold is guaranteed in the full sense of the word.

A CARD FROM THE
AMERICAN WATCH COMPANY,
Of Waltham, Mass.

This Company beg leave to inform the public that they commenced operations in 1859, and their factory now covers four acres of ground, and has cost more than a million dollars, and employs over 700 operatives. They produce 75,000 Watches a year, and make and sell not less than one-half of all the watches sold in the United States. The difference between their manufacture and the European, is briefly this: European are made almost entirely by hand, and the result is of necessity a lack of that uniformity, which is indispensable to correct time-keeping. Both the eye and the hand of the most skillful operative must vary. But it is a fact that, except watches of the higher grades, are the product of the cheapest labor of Switzerland, and the result is the worthless American. Lepines and so-called Patent Levers—which soon cost more in attempted repairs, than their original cost. Common workmen, boys and women, buy the rough separate parts of these watches from various factories, polish and put them together, and take to the nearest watch merchant, who stamps and engraves them with any name or brand that may be ordered.

How American Watches are made.
The American Waltham Watch is made by no such uncertain process—and by no such incompetent workmen. All the Company's operations from the reception of the raw materials to the completion of the watch, are carried on under one roof, and under one skillful and competent direction. But the great distinguishing feature of their watches, is the fact that their several parts are all made by the finest, the most perfect and delicate machinery ever brought to the aid of human industry. Every one of the more than a hundred parts of every watch is made by a machine—that infallibly reproduces every succeeding part with the most invariable accuracy. It was only necessary to make one perfect watch of any particular style and then to adjust the hundred machines necessary to reproduce every part of that watch, and it follows that succeeding watches must be like it.

The Company respectfully submit their watches on their merits only. They claim to make
A Better Article for the Money
by their improved mechanical processes than can be made under the old fashioned handicraft system. They manufacture watches of every grade, from a good, low-priced and substantial article, in solid silver hunting cases, to the finest chronometer; and also ladies' watches in plain gold or the finest enameled and jeweled cases; but the indispensable requisite of all their watches is that they shall be GOOD TIMEKEEPERS. It should be remembered that, except their single lowest grade named the "Home Watch Company, Boston," ALL Watches made by them

ARE FULLY WARRANTED
by a special certificate, and this warranty is good at all times against the Company or its agents.

U. S. INTERNAL REVENUE.

THE UNDERSIGNED has taken an office in Myre's building next door to the Temple Saloon, on Court street, Auburn, where he can be found daily (except Sundays or when necessarily absent on official business) from 9 A. M. until 4 P. M. Communications should be addressed to him as follows:

W. H. FELLOWS,
Dep't Col. 4th Div. 4th Dist.,
Auburn, California.

Remittances may be made by Wells, Fargo & Co.'s Express, or through the Post Office by money orders or registered letters.

CENTRAL PACIFIC R. R. COMPANY

ON AND AFTER AUGUST 1st, 1867,
until further notice, the trains of the Central Pacific Railroad will run as follows:

GOING EAST:
Passenger trains leave Sacramento at 6:30 A. M., and arrive at Cisco at 11:30 A. M. also, at 3:35 P. M., arriving at Cisco at 5:15 P. M.

GOING WEST:
Passenger train leaves Cisco at 7:05 A. M., and arriving at Sacramento at 12:32 P. M.; also at 2 P. M., arriving at Sacramento at 7:35 P. M.

The running Passenger Trains connect at Auburn with stages for Yankee Jims, Forest Hill, Michigan Bluffs, Greenwood and Georgetown; and at Colfax with stages for Grass Valley, Nevada, and at Colfax with stages for Forest City, Downsville and Iowa Hill; and at Cisco with stages for Summit City, Austin, Virginia City, and all points in the State of Nevada.

The 6:30 A. M. up train connects at the Junction with the cars of the California Central Railroad for Lincoln and Marysville and all points north. All trains run daily, Sundays excepted.
C. CROCKER, Superintendent.

PIONEER STAGE COMPANY.

NEW ARRANGEMENT.

ON and after MAY 8,
1867, the Coaches of the Pioneer Stage Company will
Leave Cisco daily at 12:15 o'clock, P. M., for Virginia City, Nevada.

Returning, arrive at Cisco at 6:30 A. M. This line connects at Colfax with the coaches for Iowa Hill, Grass Valley, Nevada, Marysville and all points north.

Office, at Wells, Fargo & Co.'s Express Office, Alta. J. HAMMOND, Agent.

CHARLES E. OLNEY.

"ALONE, ALL ALONE."—The editor having departed on a trip to the "city of magnificent distances" and State Fairs, we, the sole and reliable "joir" attached to this establishment, have got supreme control of the institution for the nonce, and shall run it to suit ourself. If there is such a thing as a moral local item, such as a dog fight, sluice robbing, Chinaman killed, or anything of the kind, we want to hear of it. By the way, when the "boss" left he had all his "storeclothes" and a clean shirt on, and we would thank Mr. Watson, the gentlemanly conductor, to return him in the same condition, for which kind office we will hold ourself his debtor in the amount necessary for the purchase of a square drink.

DRAMATIC READINGS.—C. B. Plummer, the well known elocutionist, gave an entertainment last night at Union Hall, consisting of select readings from the poets, humorous imitations, etc. Mr. Plummer is one of the best elocutionists in the State, and every evening spent at his readings is one of pleasure and profit.—*Solano Press.*

Mr. Plummer reads at the Theater to-morrow evening. Our people are sufficiently well acquainted with the versatile talents of this favorite to make our task light in descending upon his merits as an elocutionist and delineator. He has appeared before crowded audiences in our largest cities—and frequently for a consecutive number of nights—with the greatest success. The reading is for the benefit of little Cora and Addie Plummer, the proceeds to be used in their education. Not to see "Yankee Plummer" is to be behind the times.

MERIT APPRECIATED.—We see by the report of the committee on machinery at the late State Fair that our townsmen the Messrs. J. H. & A. E. Redstone have first Premiums awarded to them as follows:

"We recommend Redstone's Portable Sawing Machine and Mill for First Premiums on account of originality, simplicity and the effective manner in which each works."

"We recommend as worthy of honorable mention Redstone's Model Steam Engine, for originality of design and the effective simplicity with which reciprocating is converted into rotary motion and the easy and simple manner of reversing the same."

"We also recommend a model Shingle Machine by the same inventors, as worthy of consideration for originality of design and apparent utility."

It will be seen that the word "originality" occurs in the mention of each of their machines in the committee's report, and occurs in but one other instance throughout the entire report. This, we think, is one of the highest compliments for mechanical ability paid to any exhibitor at the Fair. These gentlemen have other and important inventions among which is a Cut-Off for steam engines that any part may be handled at any instant—in case a cylinder head is blown off the steam can be instantly cut off leaving the working of the other end to be a single-acting cylinder. Steam may be cut on or off at any stroke, and the whole arrangement with reverse is so simple that it seems strange that so little machinery will accomplish so much.

A GOOD QUARTZ VEIN.—Messrs. Smithwick, Rich and Eddings of Texas Hill are owners of a ledge near Canada Hill, on the South Fork of the American River which is now being worked with *arrastras*, regularly yielding seventy-five dollars per ton. The vein is narrow; at the surface it is of insignificant width; at the depth of twenty feet (the present depth of the company's excavations) it is two feet in width and apparently steadily widening as the work descends. The vein stands perpendicular, and the walls are of granite. We hope our friends of Texas Hill may realize something handsome from their discoveries, and our knowledge of "indications" leads us to believe they will.

A SMART LITTLE MILL.—The Sawmill at Blue Canon, employing six men in the mill, frequently saws from twelve to thirteen thousand feet per day, and one day last week sawed twenty-two thousand five hundred feet.

THE publisher of a paper at West Chester, Pa., was recently fined \$45 for sending nine papers through the mail, each one contained a hand bill, it being contrary to the postal law to enclose hand-bills in a newspaper sent by mail. Publishers of newspapers will take warning.

ON TO ROME.

Garibaldi is rallying the liberators of Italy to depose the Pope, and Victor Emmanuel warns all Italians against participating in the attempt, while at the same time the Pope has declared the laws of this same King of Italy null and void. Church property must not be sold by the Government, says the Pope; it must, say the laws and Victor Emmanuel. But at the same time it is a crime to overthrow the Pope. Time only can tell how things are to be reconciled, or in what way settled. If the disposition of the Pope and church property could be left to a vote of the people of Italy, there is little doubt that the one would be stripped of temporal power, and the other devoted to public uses. But the people of Italy can not yet be trusted to govern themselves, both King and Pope hold them in check with tyrannous hand. Nor is this the worst of their difficulties. Forty thousand, or less, French troops are waiting at Toulon to pounce upon Italy once more if any harm is to come to the Pope. It is time that Emperors, Kings and Popes be taught that the people are sovereign. That no one man has any better right to enforce his will by arbitrary power than another. That man's infallibility and divine right to rule, are relics of barbarism, to be buried from the sight and banished from the minds of men. If the Pope is infallible, let fallible men rule; for he has been at the head of the worst governed States in Christendom. If any civilized country has more paupers than Italy, we have not heard of it. If the masses could well be more squalid and ignorant, we cannot see how. If Popes and Kings have not proved failures as rulers, then pray what is failure? Let Garibaldi and his Roman compatriots then emancipate the "Seven-hilled City"—the sooner the better, say we. Every true lover of liberty on earth will give them a God-speed, and our Government should say to the "nephew of his uncle," "hands off"—the people of Italy must be permitted to establish a government to suit themselves and the nineteenth century. On to Rome!

MINING ACCIDENT.—Mr. King, of this place was severely injured last week while working in his claim, by the falling of a large stone upon his neck from the bank of the diggings.

CALL.—If you want fine Fall or Winter dry goods, clothing, etc., call at the establishment of Messrs. Adler & Hudepohl, on Main street. You cannot fail to be suited.

A CHINESE GHOST.—It will be remembered says the *Territorial Enterprise*, that early last Winter a row occurred in Chinatown, and that a Chinaman was shot and mortally wounded. He was brought to the station house and placed in a cell, where he died and was forgotten, and ever would have been forgotten, but for a circumstance that occurred night before last, when two men were placed in the same cell. About 12 o'clock at night the door opened, and in marched a Chinaman with a huge pair of boots thrown across his arm and a bowie-knife in his hand. After taking a short survey of the situation, Mr. Chinaman walked to the side of the cell and in the most spiteful manner drew back his arm and struck his bowie-knife into the wall, when he immediately disappeared. The prisoners were alarmed and raised a great outcry. McGinnis, City Jailor, came and asked what was the matter. The men told their story, and McGinnis laughed at them as dreamers. But, later in the day, Downey, special policeman from Chinatown, came round, and hearing the story, questioned the men in regard to the appearance, etc., of the Chinaman, when, from the description, he at once recognized him as the Celestial who was shot, and who some seven months since, died in the same cell in which the men are confined. At the time the Chinaman was shot he had a pair of boots across his arm and drew a bowie-knife after being mortally wounded, but had no chance to use it. Neither of the prisoners had ever heard of the circumstances of the shooting and arrest of the Chinaman. This, we take it, is about as good and square a ghost story as ever transpired on this side of the mountains. We have the particulars from George Downey, Captain of Police in this city.

WHO KNOWS BEST?—Swinton, in his "Twelve Decisive Battles," says the rebels had about 35,000 men at the battle of Stone River. General Rosecrans says they had about 62,000. He says: "I know that we took prisoners from 132 regiments of infantry, 12 battalions of sharpshooters, 23 batteries of artillery, 29 regiments of cavalry, and 24 cavalry commands less than regiments. By any reasonable computation of the strength of these organizations, can they aggregate only 35,000 men? Try it."

HOPES FOR THE LOST CAUSE.—The *Old Guard*, a Democratic magazine, says that when the great work of the war has been undone, "Democracy will resume its glorious march, and the dreams of the future secessionist become living realities of the future. Instead of dying in vain, the names of Sidney Johnston, Stonewall Jackson, and their heroic compatriots, will be immortal forever, for however masked or misunderstood, they were true champions of Democracy, and martyrs of American civilization."—This is candid enough. What room has any one to think, after reading this declaration, that the rebel Confederacy is a lost cause?

MINING LEGENDS.

EDITOR ENQUIRER.—Although it is generally supposed that the mineral regions of Placer county have been pretty well explored, there is a tract embracing the head waters or multitudinous branches of the North Fork of the American River, which, it appears, is almost wholly unexplored, and—If the legends of the place be true—unexplorable. That there is gold thereabout, "heavy gold," several old mossy-backed dwellers of this slop can tell you, and perhaps recite to you a legend or two of prospectors penetrating there in olden time, discovering "powerful rich diggings," returning toward civilization for tools and provisions, and—never being able to find their way back to the place again. A very mysterious region, and rich in legends, if in nothing else. It is located—Well if you should jump aboard the cars at the Dutch Flat station and ride towards the summit a dollar and a quarter's worth, or rather as far as Crocker allows one to ride in the direction for the amount of money, you would arrive at Blue Canyon station. Thence due east a day's smart walking would take you into the fabled region.—You would think it the roughest day's travel that you ever traveled in your life, and as you reflected upon going out again, you would pray for the wings of a bird, that is if you were piously inclined and would pray for anything. Otherwise, possibly, you might swear a little that you would be—If ever caught adventuring there again. "Old Block," of Grass Valley, a very religious character, once went prospecting there for quicksilver, wrote his adventures, and swore like a trooper at the roughness of the country.

One of the principal legends of the place is that of McGru's adventure or misadventure, which gave birth to the name of one of our mining precincts—Lost Camp. It runs: McGru and two companions, with three days' provisions, started late in the Fall of '53 from Liberty Hill, in this county, upon a prospecting expedition, traveled in an east by south direction, crossed three considerable river beds, encamped began prospecting at a fourth river, put in a little wing-dam, and panned out nine hundred dollars, when it began to snow, and the party skedaddled for Illinoistown, where they separated, with mutual pledges of secrecy and agreement to return together to the place the following Summer. That McGru's partners wandered south, struck rich diggings, sold out and returned to the States without apprising McGru thereof, who, as the time agreed upon for the return rolled round, marshaled a party and set forth for the scene of his discovery. They moved in grand state with long train of pack animals, piloted the caravan to the east branch of the North Fork of the American River, and ordered a halt immediately before Bald Mountain, now known as Texas Hill, declaring that the river which washed its base was "the place." Leaning his rifle against a tree, the legend runs, he sprang down the bank of the river in advance of the party, who, following, found him standing as one amazed, dumbfounded, lost; and upon questioning him he admitted that he was amazed, dumbfounded, lost; that it was not "the place," when the whole party became amazed, dumbfounded and lost, quarreled, dispersed, rambled about, turned back, struck diggings some miles below, which, in derision of McGru's being unable to find his place were dubbed "Lost Camp." FLAMINGO.

[To be continued.]

RUMORED DUEL.—The *Oakland News* pokes fun at a couple of San Francisco belligerents in this wise: "There are vague rumors of a duel between the editor of the *Dramatic Chronicle* and Mr. Wemyss Johnson, a blood-thirsty Englishman, a relative of the Duke of Wellington. The difficulty arose from a paragraph in the *Chronicle*, which the other construed as offensive to the British Government. It is said that the parties have arranged to sit astride of a barrel of nitro-glycerine and fire a pistol into the bung-hole."

CEASED.—The *Wilmington Journal* has ceased to exist. Cause, too much Democracy in Los Angeles county for literary institutions.

If you wish the very best CABINET PHOTOGRAPHS, you must call on BRADLEY & RULOFSON, 429 Montgomery street, San Francisco.

DIED.

At Colfax, September 22d, the infant daughter of Elijah S. and Jessie Yates, aged three months and eight days.

U. S. INTERNAL REVENUE.

FOURTH DISTRICT, CALIFORNIA.

TAX on Income, Watches, Carriages, Silver Plate, etc.—Notice is hereby given that the Annual List of Taxes as assessed by Thos. J. Blakener, United States Assessor for this District, has been received by me, and is now due and payable.

For all taxes unpaid at the expiration of twenty days from the date of this notice, demands will be served for the Tax and a fee of twenty cents, and mileage at the rate of four cents per mile if served in person, and at the expiration of ten days from the date thereof, a penalty of five per cent. and interest at the rate of one per cent. per month will be added, together with the necessary costs of distraint, as provided in accordance with an Act of Congress passed June 30, 1864, and amended July 13, 1866.

ALFRED BRIGGS, Collector Fourth District.

W. H. H. FELLOWS, Dep't Collector.

DUTCH FLAT HOTEL.

MAIN STREET, DUTCH FLAT.

CHARLES SEFFENS, - - Proprietor.

THIS HOUSE BEING NOW FULLY completed and arranged in all its appointments presents greater inducements to transient as well as permanent customers than any other establishment of the kind in the mountains. The proprietor having been in the business for a number of years, flatters himself that he is sufficiently known as a caterer to public taste to warrant their support.

LARGE AIRY ROOMS.

With clean bed linen, well ventilated are requested that should not be dispensed with but which are ALWAYS found at this house.

THE TABLE

will always be found supplied with the latest delicacies of the season, and polite and willing waiters always in attendance. In connection with the house is a BAR ROOM, always supplied with the best.

WINES.

LIQUORS

and CIGARS.

to be had in the market. An experienced bar-keeper constantly at hand to wait upon customers.

SUMMER RETREAT!

To families and all strangers in the mountains the proprietor would say that Dutch Flat presents all the inducements of a Summer Retreat, being located on the line of the Pacific Railroad at a convenient and pleasant distance from the city, is easy of access to those whose means are limited and require fresh air kind treatment and good living. All the proprietor asks is an opportunity to prove the correctness of the above assertions.

LIVERY STABLE.

Connected with the hotel is a first-class Livery Stable, where

Carriages and Horses can be had for all parts of the country. Parties supplied with carriages with or without drivers. Carriages from this hotel will be found at the depot on the arrival of every train.

GOLD RUN EXCHANGE.

Main Street, Gold Run, Cal.

C. A. RICHARDSON, - - - - - Proprietor.

THE Proprietor respectfully announces to the citizens of Gold Run and the public generally that he has completed his

NEW AND SPACIOUS HOTEL.

and is prepared to accommodate an unlimited number of persons. He pledges himself to every exertion to make those calling upon him satisfied by furnishing the

BEST ACCOMMODATIONS, and losing no opportunity to render an equivalent to customers for their money. The house is well furnished and new, and all that is asked is an opportunity to convince the public that he can "keep a hotel." f29-1f

WRIGHT'S RESTAURANT.

MAIN STREET, DUTCH FLAT.

THE proprietor respectfully informs the public that he has opened a first-class Restaurant where the

VERY BEST MEALS

may be obtained at all times at the most reasonable prices.

Attending personally to the interior arrangements of the house, the proprietor pledges himself to see that the public shall be accommodated all who may give him a call in a manner unsurpassed by any house in town. f19-1f

IRRA A. EATON, I. WILLIAMSON.

UNION HOTEL.

MAIN STREET, - - - - - NEVADA.

EATON & WILLIAMSON, Prop'rs.

THE attention of visitors to Nevada is called to this new, elegant and first-class hotel, which is kept in a most superior manner. The Union contains one hundred well ventilated, commodious and splendidly furnished rooms, offering every advantage desirable to the traveler or transient party.

THE BAR

is fitted up in a style not surpassed by any house in the State, and all its contents are of the choicest kind.

THE BILLIARD ROOM.

One of the best supplied in the State, is provided with new tables of Phelan's patent. g3-1f

STARR'S EXCHANGE.

HEAD OF MAIN STREET, COLFAX.

THIS house, situated at the most central locality in Colfax, and Colfax being the center of a radius of the most prosperous mountain towns in the State, presents an eligible point from which to gather the most reliable information of the mining, commercial and social advantages of the most populous portion of the country. Being located but a few steps from the railroad depot presents every advantage desirable to the traveler or resident. Every accommodation furnished to make it a home for families as well as a pleasant stopping place for transient customers. Connected with the hotel is a first class

LIVERY STABLE!

where horses and carriages can be obtained for all parts of the mines. Parties furnished with every description of conveyance at the shortest notice and on reasonable terms.

TO THEATRICAL COMPANIES.

The undersigned has fitted up an elegant hall for theatrical and dancing purposes; and having procured all the paraphernalia necessary to the use of theatrical exhibitions is now prepared to accommodate all who may call. B. H. STARR, Prop'r.

WILLIAM H. HILLHOUSE,

DUTCH FLAT SAW MILL,

THE above Saw Mill being the oldest

established mill now in operation in the vicinity

of Dutch Flat, having been lately repaired, is

now capable of cutting lumber equal to the most

celebrated mills in Placer county. We have on

hand a general assortment of seasoned and green

lumber, hard and soft lumber, and having

Reduced the Prices

to correspond with the times, will sell as LOW as

a LITTLE lower than any other Saw Mill in this

vicinity.

We are now receiving in the yard a large and

superior lot of saw logs, and can fill orders for lumber

with dispatch of all usual dimensions, varying in

length from 10 to 3

SEMI-WEEKLY ENQUIRER.

THE TRACK-LAYING MACHINE.—From a San Francisco correspondence of the Humboldt Register, which exemplifies the old saying that "you must go away from home to get news." My predictions about Robertson's Track-laying Machine, though somewhat delayed, are about being verified. It is completed, and has been fully tested, and does the work of laying ties and rails, both straight and curved, the machine carrying the rails to any degree of curvature as the rails are being sent forward. It is to be taken down immediately and shipped to the eastern slope of the Sierra Nevada mountains, on the Central Pacific Railroad, and at once start on its trip towards Salt Lake. It is possible, however, that the machine now built may be put on the Vallejo road, if that company can get iron rails in time, and another machine be built to run on the Central Pacific Railroad, which can be done by the time the summit tunnel is ready for the passage of the cars. If taken to the Vallejo road, it will not be necessary to take it down, as it can be run on its own road aboard of a schooner or scow, landed at Vallejo and make its track to the grade. This sounds Munchausenian, but it is nevertheless true, and is no exaggeration of the capabilities of the machine. Before many moons—as we Pious used to say—you will see it steaming along the Humboldt valley and through your country, now on the outskirts of civilization, but soon to be so near the Pacific that at your supper you may read the San Francisco papers. Mr. Robertson has been untiring in his efforts to perfect this machine, and much credit is due to I. H. Small for the perfection of the engine and machine works manufactured by him for this express purpose. For the finish compactness and adaptability for a special and novel purpose, the engine and machinery cannot be excelled, if equaled, by any of the larger foundries, or any other machinist in the city.

A NEW CEMENT.—The Paris *Galvani* of July 22d says that M. Sorel a short time previously communicated to the Academy of Sciences a new cement, being a basic hydrated oxychloride of magnesium. It may be obtained by slaking magnesia with a solution of chloride of magnesium in a more or less concentrated state. The denser the solution, the harder it becomes on drying. This magnesian cement is the whitest and hardest of all those known to this day, and it can be molded like plaster, in which case the cast acquires the hardness of marble. It will take any color, and has been used by the inventor for mosaics, imitations of ivory, billiard balls, etc. The new cement possesses the agglutinative property in the highest degree, so that solid masses may be made with it at a very low cost by mixing it up on a large scale with substances of little value. One part of magnesia may be incorporated with upwards of twenty parts of sand, limestone and other inert substances, so as to form hard blocks; while the lime and other cements will hardly admit of the incorporation of two or three times their weight of extraneous matter. By means of these artificial blocks, building may be carried on in places where materials for the purposes are scarce. All that is required is simply to convey a quantity of magnesia and chloride of magnesium to the spot, if there be none to be had there and then to mix them up with sand, pebbles, or any other matter of the kind close at hand; blocks can then be made of any shape, and imitating hewn stone. This magnesian cement can be obtained at a very low cost, especially if the magnesia be extracted from the mother ley of salt-works, either by M. Beland's process, whereby magnesia and hydrochloric acid are obtained at the same time, or else by decomposing the ley, which always contains a large proportion of chloride of magnesium. By means of quicklime, which by double decomposition, yields magnesia and chloride of lime containing a certain quantity of chloride of magnesium, and which, with the addition of various other cheap substances, may be used for white-washing.

REDSTONE Quartz Mining Company. Lost Camp District, Placer county, Cal.—Notice.—There is delinquent upon the following described stock on account of assessment levied on August 2d, 1867, the several amounts set opposite the names of the respective shareholders, as follows:
